**ADVANCED ASIAN ROTATING ELECTRICAL AND
BATTERY CLINIC**

Goal: Show how to properly diagnose the Asian electrical systems in today's vehicles.

In this clinic you will see a technically oriented training presentation that focuses on advanced systematic testing of modern computer controlled charging and starting systems.

There are so many of these vehicles in our area, and they are having problems with the starting and charging systems.

This class duration typically runs 2 ½ - 3 hours.

You will receive a Certificate stating you attended this Asian Rotating and Electrical clinic.

Dinner served at 5:30

Date: Wed April 27th, 2016

ASIAN ROTATING ELECTRICAL AND BATTERY CLINIC

Wed APRIL 27th, 2016

System overview and testing:

- 1) Brief review of electrical testing procedures and tips
- 2) In depth look at the operation of various Asian import computer control systems
- 3) Multi-approached battery charging system and starting system diagnostic procedures using multi-meters, scan tools and lab scopes for enhanced accuracy

Advanced Asian Rotating Electrical and Battery Clinic Questions:

- 1) Which Asian import has jumped on the battery registration bandwagon?
 - 2) What is ELD on a Honda and how is it unique?
 - 3) What is multiples systems on Toyota?
 - 4) How does networking play a part in charging systems?
 - 5) What role does the IPDM play in Nissan alternators?
- 6) What are we looking for on scope patterns of starters and alternators and how this helps take the guesswork out of diagnostics?
